Ultimate Tyres Website Redesign Proposal

1. Project Objectives

The goal is to transform `ultimatetyres.com.au` from a standard informational site into a high-performance B2B and B2C digital hub. The new platform must project authority in the Australian commercial tyre market, matching and exceeding the digital footprint of competitors like Tyremax and NTAW.

Core Deliverables:-

- Modern Aesthetic: A rugged, professional, and trustworthy UI design tailored for the automotive and fleet industry.
- Dealer Portal Integration: A secure, gated environment where authorized dealers can log in, view live inventory, and place bulk orders for Ralson, Blacklion, and Triangle tires.
- Interactive Network Map: A dynamic map allowing users to find their nearest Ultimate Tyres dealer or service center.
- Mobile & Conversion Optimized: Flawless mobile responsiveness paired with immediate communication channels (WhatsApp widget, Click-to-call).

2. UI/UX Strategy (The "Showroom")

Base on the benchmark sites : att.com.au, getagriptyres.com.au, the visual language should utilize high-contrast industrial colors (Deep Charcoal, High-Vis Red, and Clean White).

- Top Utility Ribbon: Persistent on all pages, giving instant access to the Dealer Login, Toll-free number, and WA widget.
- Rich Media Integration: The homepage to utilize high-quality background videos of trucks in motion and fleet maintenance to immediately establish industry context in the banners (total 5 banners – 2 static, 2 video).
- Brand Highlights: Dedicated showcase carousels for the flagship ranges: Ralson, Blacklion, and Triangle.

3. Website Blueprint & Information Architecture:
Below headings to be used

1. Home
2. About Us (Brand history, mission, facility detailing)
3. Products – Tyres (Drop-down)
    1. Overview
    2. Trucks Tyres
    3. Buses Tyres
4. Fleet Services (Includes the new Truck Maintenance categorization) (Drop-Down)
    1. Truck Maintenance
    2. Wheel Alignment Services *(Detailed landing page per reference image)*
    3. Truck & Car Wheel Balancing
    4. Steering and Suspension Repair
    5. Nitrogen Tyre Inflation
    6. Puncture Proofing
    7. Tyre Fitting Services
    8. Ultimate Tyre Exchange (Ultimate ReadyFit)
    9. Wheel & Rim Solution (U-Wheels)
5. News & Events
6. Network Map (Interactive locator)
7. Contact
8. Join Us (Careers / Become a Dealer)

<u>Side Ribbon Top:</u>

Client Portal / Dealer Login,
Links to Social Media
Tollfree No.

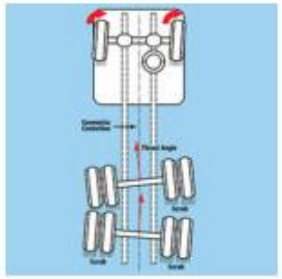

<u>WhatsApp Direct contact</u>

Under Fleet Services/Truck Maintenance : Drop Down :
“WHEEL ALIGNMENT SERVICES”

Wheel Alignment Services

Millions of dollars have been spent on streamlining, improved drivetrains and energy efficient engines. Yet most operators neglect one of the most effective ways to reduce operating costs...
A Complete Wheel Alignment!

Improper wheel alignment significantly shortens tyre life and increases fuel consumption

It's estimated that over 70% of the trucks on our roads have misaligned drive axles. To keep the trucks going straight, the turning force of the axles must be offset by turning the front wheels in the opposite direction. This causes all wheels to scrub out...kilometre after kilometre.

FACT: It takes just a tenth of an inch to have a big impact on your cost!

Here's what our Total Wheel Alignment can do for you

■ **Improve Handling**
Proper alignment is necessary for optimum handling characteristics - contributing to increased safety and reduced driver fatigue especially line haul.

■ **Minimise Rolling Resistance**
Total Alignment sets all wheels parallel. This works (with proper inflation) to minimise rolling resistance and improve operating efficiency, which helps reduce fuel consumption. To keep the trucks going straight, the turning force of the axles must be offset by turning the front wheels in the opposite direction. This causes all wheels to scrub out... kilometre after kilometre.

4. Technical Implementation: Dealer Portal
    1. Login Page (Controlled Login ID and password by UT) – Register for new
    2. Landing Page after login to show Features: Tyre selector, Photo and specifications, Wholesale pricing visibility, rapid-order forms SKU-wise, past order history, and account management.

1. MASTER BRANDING and TAGLINE

The Brand Archetype: **The Dependable Co-Pilot**

In the commercial transport sector, downtime is the enemy. Ultimate Tyres needs to project unwavering reliability, industrial strength, and operational efficiency. The branding should be bold, highly visible (using the Charcoal, High-Vis Red, and White palette), and instantly recognizable to a truck driver or a workshop manager.

Proposed Taglines

- **Your Fleet. Our Drive**
- **The Ultimate Foundation for Every Journey**

- PROPOSED COMMUNICATION

Australian B2B communication needs to be straight-talking, benefit-driven, and devoid of corporate jargon.

The Communication Pillars:

- **Profitability through Durability:** For fleets, we communicate Cost-Per-Kilometer (CPK). We don't just say "our tyres last longer"; we say, "Maximise your casing life and cut fuel costs with our total alignment and premium tread solutions."
- **Frictionless Wholesale:** For dealers, the message is speed and access. "Live inventory, instant ordering, zero headaches."
- **Nationwide Backbone:** Communicate that while the geography of Australia is vast, our network map and distribution channels make us local.

Analogy: Imagine a hardware store trying to sell a premium drill. The amateur buys the drill because it looks shiny. The professional contractor buys the drill because they need to make 10,000 holes this month without the motor burning out. Our communication must speak exclusively to the contractor. We talk about the "holes" (uptime, fuel savings, quality, best recommeidations), not just the "drill" (the tyre).

3. APPROACH TO COMMUNICATE OUR BRAND (Channel Strategy)

How do we push this communication out to the market?

- **The "Portal as a Product" Approach:** For your dealers, the new website is the brand experience. By offering a flawless, mobile-friendly B2B ordering portal where they can check stock on their phone while under a truck, you communicate that you value their time.
- **Educational Authority:** Use the "News & Blogs" and "Fleet Services" sections to position Ultimate Tyres as thought leaders. Don't just list "Wheel Alignment"; explain why a 1/10th inch misalignment costs them thousands in fuel.
- **Instant Accessibility:** The WhatsApp integration - "We are on standby for you right now."
